

Flying 20 Club Safety Briefing

Understanding the systems specific to the aircraft you fly can give you peace of mind, as well as save you in the event of an emergency. At this safety briefing we will explore all of the common aircraft systems (fuel, electrical, control systems, etc), and some of the lesser-known systems (pitot-static drains, emergency avionics switch) specific to the Piper PA-28. Briefing will include a review of emergency procedures, various in-flight emergencies and strategies for preventing emergency situations. This event is open only to members of the Flying 20 Club. For additional information, please contact Gary Baluha at 203-794-4629.

Directions: I-84, Exit 3, Rt-7, to airport exit, left turn on to Sugar Hollow, right turn on to Miry Brook. Located behind #47.
